A note on note production

Hey guys,

Figured out how we have to do the notes. I reached out to a developer of a similar application, and he recommended that we do the following:

1) Use the Bravura font to create notes. It's available here. http://blog.steinberg.net/2013/05/introducing-bravura-music-font/
2) We *may* have to manually draw the staff and ledger lines. So we *might* need a DrawStaff class as well.
